Own vehicle

Languages

Spanish: Native

English: B2 (Quality language in action - Certificado Cambridge)

Soft Skills

Nice comunication

Leadership ability

Team management and work

Problem resolution

Customer service

Continuous learning

Flexibility in the face of changes

Tools and Technologies

Below I show some of the tools and technologies that I have learned to use during my academic training and projects:

- Java
- Python
- AWS
- Angular
- JavaScript/HTML/CSS
- Wordpress
- C++
- C#
- GitHub
- SQL/NoSQL
- Spring Boot
- .Net

About Me

Young, eager to learn and a programming enthusiast. I consider myself a hardworking, communicative and empathetic person who always strives to give their best to create the best possible experiences for the user.

Academic Studies

High School Diploma, Technology Track - IES La Cañuela
2019 - 2021

Design and Development of Videogames - Rey Juan Carlos University

2021 - 2025

Work Experience

INbodas - Waiter in "Los Rosales de Cubas"

It brought me:

- Teamwork
- Public facing experience
- Attention to details
- Adaptability

FunTech Rocket - Web Developer

It brought me:

- Proficiency in HTML, CSS, and JavaScript
- Experience in web architecture, APIs, security, and optimization
- Backend development knowledge
- Project management

Projects

Development of a Competitive Web Game

I developed **gameplay systems**, **interactive mechanics**, and **UI implementations** for a competitive web game using **Unity (C#)**. My responsibilities included **coding player-facing logic**, managing **version control with Git/GitHub**, and integrating **3D assets**, **textures**, and **audio** into the game engine. The game is currently available on **Itchio**. **Link**

Tools: Unity, C#, GitHub, Visual Studio, 3ds Max, Substance Painter, Audacity.

Development of a Game for Mobile Devices

I developed **game mechanics**, integrated **visual assets**, and **audio systems** using **Unity (C#)**. I managed **version control with GitHub** and optimized **performance for mobile devices**. The game is currently in **closed beta** on the **Play Store**.

Tools: Unity, C#, GitHub, Visual Studio, Android Studio, Audacity.

You can see all my projects in my portfolio
